Barış Kuzu

Dynamics 365 CE Developer

Istanbul, Turkey · +90 532 668 9403 · bbariskuzu@gmail.com · github.com/kh3ldar · linkedin.com/in/beratbariskuzu/

PROFESSIONAL SUMMARY

Dynamics 365 Customer Engagement developer and sole technical owner of a full-scale Sales & Customer Service implementation — PCF controls (React + TypeScript), C# plugins, ERP integrations, and workflow automation, end to end. An operations-leadership background brings the business-process fluency to keep technical decisions aligned with how the organization actually works.

TECHNICAL SKILLS

Languages	C# · TypeScript · JavaScript
Power Platform	PCF · Dataverse Web API · Plugins & Custom APIs · Power Automate
	FetchXML · Power Fx · Model-driven Apps
UI	React · Fluent UI
Tooling	Git · PAC CLI · Managed Environments
Integration	OAuth2 / REST · ERP Synchronization · Microsoft 365 / Exchange

SELECTED PROJECTS

ProductAddGrid — multi-entity product entry dialog
github.com/kh3ldar/ProductAddGrid

PCF control hosted on a Custom Page, serving opportunities, quotes, orders, and custom tables from one codebase with no per-entity branching. Catalog search, inline editing, and in-memory staging committed in a single save, with basket state persisted across reloads. Integrates a Dataverse Custom API for product requests.

ProductGrid — view-driven editable grid for Dynamics 365
github.com/kh3ldar/ProductGrid

PCF control (TypeScript, React, Fluent UI) replacing the stock subgrid where the platform offers no client-side extension point. Cross-table validation that reaches through a lookup before the write commits, per-entity command buttons, and delete guards are declared as JSON — supporting a new entity is a config block, not a code change. Columns and metadata resolve from Dataverse saved views at runtime. English / Turkish localized.

EXPERIENCE

Dynamics 365 Developer *Mar 2024 – Present*
eMind — Istanbul, Turkey

- Sole technical owner of a full Dynamics 365 Sales & Customer Service implementation, across dev and production environments.
- Built and maintain 30+ C# plugin assemblies with a shared services layer, shipped as plugin packages.
- Developed production PCF controls (React + TypeScript), configuration-driven to serve multiple entities from a single codebase (see Selected Projects).
- Extended forms across the solution with JavaScript for client-side logic and validation.
- Integrated Dataverse with an external ERP over OAuth2 / REST for real-time stock and order synchronization.
- Managed solution ALM with source control, Managed Environments, and PAC CLI export / import.
- Automated business processes with Power Automate and Power Query dataflows.

Operations Team Manager *Sep 2020 – Dec 2023*
Conectys — Istanbul, Turkey

- Owned team KPIs, quality, and delivery for a global BPO client, leading a team to consistently exceed accuracy and SLA targets.
- Drove cross-team initiatives and acted as the primary point of contact for client and internal stakeholders.

CERTIFICATIONS

Microsoft 365 Certified: Fundamentals (MS-900) — Credential ID 996444501

EDUCATION

French Language and Literature *2011 – 2017*
Namık Kemal University — Tekirdağ, Turkey
